The diagram illustrates the NVRAM structure. It features a large rectangle labeled "NVRAM" at the top left. Inside this rectangle, there is a smaller table-like structure labeled "NVRAM EXTENSION TABLE". The table has 8 rows and 2 columns. Arrows point from labels to specific parts of the table: "155" points to the top-left cell, "156" points to the first column, and "158" points to the second column. A label "154" is also present at the top right of the NVRAM area.
